SUMMARY

Full stack Software Engineer with production experience in Java, Spring Boot, React, and TypeScript. Skilled in REST API design, responsive UI development, and test-driven delivery across agile teams. Currently focused on AI evaluation and tooling, building LLM benchmarks, adversarial test suites, and full-stack AI-powered applications.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Java, Python, React, Next.js, Spring Boot

Frontend: HTML, CSS, Tailwind CSS, Bootstrap, Redux

Backend & Infrastructure: Node.js, Express, SQL, Git, Docker, AWS, GitHub Actions, CI/CD

Testing: Jest, React Testing Library, Playwright, JUnit

AI Tools: Cursor, Claude, Claude Code, Codex

EXPERIENCE

AI Trainer Nov 2025 — Present
Handshake AI | Contract Remote

- Evaluated and refined AI-generated code across JavaScript, Java, and Python for correctness and best practices
- Engineered adversarial benchmarks on real codebases, building solutions and fail-to-pass tests to expose LLM weaknesses
- Authored LLM task prompts and grading rubrics to evaluate model behavior on ambiguous and edge-case problems
- Analyzed and scored model output quality across code correctness, reasoning, and adherence to best practices

Production Operator Jun 2024 — Feb 2025
Abbott Nutrition Columbus, OH

- Operated packaging equipment and coordinated with a team of 12 to meet daily production and quality targets

Software Engineer May 2022 — Apr 2023
TEKsystems Remote

- Designed and implemented RESTful APIs using Spring Boot and SQL powering core ecommerce workflows
- Built responsive frontend features with React and TypeScript integrating seamlessly with backend services
- Drove TDD adoption across frontend and backend using Jest, RTL, and JUnit cutting production regressions by 30%
- Optimized SQL schemas and query patterns improving API response times and UI performance under load
- Deployed and maintained application updates via CI/CD pipelines ensuring reliable production releases
- Automated course registration workflows using Power Apps and Power Automate reducing manual steps by 50%

Software Engineer Intern Jan 2022 — Apr 2022
TEKsystems Remote

- Delivered full stack features in React and Spring Boot across active production applications in an agile team
- Participated in sprint planning, code reviews, and production deployments contributing to team velocity

Frontend Developer Intern Jun 2021 — Sep 2021
Minority Programmers Association Remote

- Built responsive UI components from wireframes using JavaScript, React, and CSS improving user experience
- Developed new UI features and optimized interface responsiveness for smoother, faster user interaction
- Integrated backend APIs to surface dynamic, real-time data across user-facing components

PROJECTS

AI Debugging Assistant | *React, TypeScript, Java, Spring Boot, Tailwind CSS* [View Project](#) | [View Code](#)

- Built a full-stack AI debugging assistant with React, TypeScript, and Spring Boot to analyze stack traces and code
- Integrated the OpenAI API with structured JSON responses, implementing validation, retry logic, and timeout handling

Pathfinding Visualizer | *React, JavaScript, Tailwind CSS* [View Project](#) | [View Code](#)

- Built an interactive React application visualizing graph traversal algorithms with real-time animation and state control
- Implemented A*, Dijkstra, BFS, and DFS algorithms with configurable weights and obstacle simulation

EDUCATION

Bachelor of Science in Computer Science Feb 2026
Western Governors University
